

Industrie Service

**Choose certainty.  
Add value.**

Globalisation and deregulated markets generate increased competition and massive cost pressure. In order to succeed, organisations need to cut costs and improve their decision-making strategies.

To do so, they need to prove their innovative capacity and consistently exploit all rationalisation potentials. »gAte« integrated plant engineering by TÜV SÜD delivers successful strategies for the processing industry.

## Cost Savings using gAte

Up to 25 % cost reductions

TÜV SÜD Industrie Service GmbH

## The solution: TÜV SÜD optimisation strategy Customised and flexible service

Significant improvements are possible by optimising measures, strategies, and procedures using TÜV SÜD service packages. These are tailored to our clients, meeting the needs of their business.

Over the entire life cycle of a plant, the TÜV SÜD optimisation strategy provides the basis for increased commercial success in competitive markets.

gAte – **g**anzheitliche Anlagentechnik  
= integral plant technology:

- Operating cost reduction
- Maintenance cost reduction
- Optimising availability
- Pro-active management of risks

TÜV SÜD meets the needs of their clients around the globe, by offering industry specific expertise and know-how and by providing economic solutions to help them to compete effectively whilst meeting the demands of national and international standards.

The international dimension of our business allows us to work around the world on our client's behalf, providing our services locally, at the same high TÜV SÜD quality.

**»We have profited greatly  
from the consulting services  
provided by TÜV SÜD.  
Even in the first year, our energy  
costs fell dramatically without  
major investments on our part«**

Helmut Ströhle, Managing Director,  
Glaszentrum Berlin-Dresden GmbH
