Testing and Approval of Aquatic Services, Water Slides and Pleasure Equipment

A Product Information Sheet by the Lifts and Machinery / Amusement Industry B.U.

Aquatic services, e.g. water slides form part of leisure facilities which, in line with various regulations (e.g. EN 1069 or DIBt), must undergo acceptance testing and annual periodic tests and inspections carried out by an officially authorised expert. In addition to acceptance testing, the EN 1069 standard for water slides requires annual maintenance of such leisure facilities.

Our services

As an experienced impartial expert organisation, TÜV SÜD offers support and state-of-the-art know-how. For water slides, we provide the following services:

- Acceptance testing of the entire facility in compliance with EN 1069 or DIBt regulations
- Annual verification of structural condition in line with DIBt regulations

- Annual verification of maintenance condition in line with EN 1069
- Annual verification of standard compliance
- Information about changes in operational regulations

Your benefits

- Legal certainty, as all relevant standards and regulations of current building legislation have been complied with
- Gain relief of operator responsibility
- Overview of current operational regulations
- Risk minimisation through information about any repair or improvement measures that may be necessary

TÜV SÜD offers a comprehensive range of services for amusement parks and structures. Interested in more detailed information about our services? Don't hesitate to contact us.

We will be pleased to explain the possibilities of cooperation and prepare a free quotation without any obligation on your part. You can rely on our excellent reputation and longstanding experience.

We provide worldwide services.
