Basic In-House Workshop: The Carbon Market

A Product Information Sheet by the Environmental Services Business Unit

An In-House Workshop – Why?

This in-house workshop intends to inform your company and staff about current developments in international carbon markets. Starting with climate policy the workshop covers the flexible mechanisms of the Kyoto Protocol and its practical applications.

Emission trading as well as the project-based mechanisms Joint Implementation (JI) and Clean Development Mechanism (CDM) are core items of the workshop.

The interactive approach allows to reflect the actual situation of your company in the light of the developments in the carbon market. Specific aspects of high relevance will be identified and discussed. The workshop concludes with a concrete, company-specific „to-do list“ indicating further actions planned.

In contrast to a broader designed and longer seminar, this one-day workshop offers for a group of up to 8 people a company-tailored and efficient form of introduction into the cornerstones of the carbon market.

Content

- Emission trading: strategic and operational challenges for a company
- UNFCCC and the Kyoto-Potocol: current status
- Emission trading schemes: current status and next steps
- Project-based mechanisms: integration of JI, CDM and emission trading
- Relationship between emission trading and other fields of environmental regulations
- Strategic aspects
- Emission profile of companies
- Technical solutions: processes, responsibilities, management systems

Your benefits

- ▶ Preparation of your company for the challenges of the carbon market
- ▶ Classification of the risk associated with the carbon market for your company
- ▶ Identification of potentials for improvement
- ▶ Identification of optimal future strategies

We have international representation.
