Periodic testing and inspection of cableway installations and ski tows

A Product Information Sheet by the Lifts and Machinery Business Area

Legal background

According to the Cableway Installation Regulations of the German Länder, all public cableway installations designed to carry persons must be tested and inspected at least once a year and all ski tows at least every second year by a recognised organisation. The exact scope of testing and inspection is set forth in the pertinent test regulations.

Our services

TÜV SÜD Industrie Service GmbH is a recognised testing, inspection and certification body and assists the operators of cableway installations and ski tows with comprehensive, reasonably priced support on all aspects of their installations' safety, quality and cost-effectiveness. Qualified support is provided by officially authorised experts:

- Periodic testing and inspection of cableway installations
- Periodic testing and inspection of ski tows
- Preparation of special expert reports
- Valuation of your installation

Additionally, we also carry out all supplementary tests and inspections such as testing for surface cracks on clamps, drives and hangers, crack testing of axles and shafts and inspection of electrical equipment.

Your benefits:

Legal certainty and technical expertise

Experts from TÜV SÜD Industrie Service boast long-standing experience in the testing of aerial cableways and ski tows. Thanks to our experts' intensive participation in the preparation of technical guidelines and directives and European cableway standards, we are thoroughly familiar with the state of the art.

Additionally, the wide public awareness and first-class reputation of the TÜV SÜD brand ensure a high level of acceptance of your reports and certificates.

Trust building

The TÜV SÜD test mark is a valuable asset in the operation of your installation. Both commercial and private customers regard this test mark as a guarantee of safety and reliability.

Cost transparency and reliable planning

You receive a detailed quotation. When scheduling the dates for testing and inspection, we will of course take your wishes into consideration.

Interested in learning more about our services? Call us, we will be pleased to provide further information.
