Certification of subsystems and safety components

A Product Information Sheet by the Lifts and Machinery Business Unit

Legal background

EU Directive 2000/9/EC on cableway installations require the certification of subsystems and safety components before the cableway installations can be placed on the market.

Our services

TÜV SÜD Industrie Service GmbH is an accredited testing, inspection and certification organisation and assists the manufacturers of cableway installations with comprehensive, reasonably priced support on all aspects of their products' safety, quality and cost-effectiveness. Our officially authorised experts certify all relevant subsystems and safety components:

- Cables and cable connections
- Drives and brakes
- Mechanical equipment
- Vehicles
- Electrotechnical devices
- Rescue equipment

Your benefits:

Legal certainty and technical expertise
Experts from TÜV SÜD boast long-standing experience in the testing of aerial cableways and

their components. Thanks to our officially authorised experts' intensive participation in the preparation of technical guidelines and directives and European cableway standards, we are thoroughly familiar with the state of the art. Additionally, the wide public awareness and first-class reputation of the TÜV SÜD brand ensure a high level of acceptance of your reports and certificates.

Trust building

The TÜV SÜD certification mark is a valuable asset in the marketing of your products. Both cableway operators and authorities regard this certification mark as a guarantee of safety and reliability.

Avoidance of follow-up costs

Comprehensive testing of subsystems and safety components by an impartial third-party enables you to optimise your components and avoid damage and follow-up costs.

Cost transparency and reliable planning

You receive a detailed quotation. When scheduling the dates for testing and inspection, we will of course take your wishes into consideration.
