## Certification Package – 1st Emissions Trading Period

A Product Information Sheet by the Environmental Services Business Unit

Inclusion of your organization in the EU's CO<sub>2</sub> Emissions Trading Scheme places you under the obligation to monitor your CO<sub>2</sub> emissions, prepare annual reports and have them confirmed by accredited bodies.

While your CO<sub>2</sub> inventory for the previous year need not be verified – and thus your emissions be covered by appropriate emissions rights – for the first time until spring 2006, ideally, you will keep informed of your emissions levels from the outset. Thus you can benefit from anticipated price fluctuations, and either save costs by

stocking up your quota or profitably sell surplus emissions rights. To ensure that your monitoring system complies with requirements right from the start and prevent unpleasant surprises, we recommend a third-party audit even before the official start of emissions trading.

### Our services

- Certification of the approved CO<sub>2</sub> monitoring system in the 2nd half of 2004
- Test verification of the current or a historical year
- Preliminary audits re verification of monitoring reports for the years 2005-2007 held in the III/IV quarter of the respective years
- Verification of the monitoring reports for the years 2005-2007 carried out in each case in January or February of the following year
- Use of our call center for questions on EU Emissions Trading

### Your benefits

- Compliance with regulatory requirements
- Timely activities on the emissions market
- Ensuring the applicability of measures
- Reduced costs for a service package
