Services as per Machinery Directive 98/37/EC for Escalators and Moving Walkways

A Product Information Sheet by the Lifts and Machinery Business Unit

Escalators and moving walkways are governed by the Machinery Directive 98/37/EC. The „state of the art“ is defined in the European Standard EN 115.

TÜV SÜD Industrie Service GmbH is a recognised testing, inspection and certification body and offers support to escalator and moving walkway manufacturers and operators, from conformity assessment to safe and cost-effective daily operation – impartial, expert and cost-effective.

Our services

- Third-party tests accompanying the manufacturing and installation process
- Periodic tests
- Inspections
- Damage assessment
- Test and expert reports including quality assurance
- Assistance in hazard assessment
- Risk evaluation support
- Training of your personnel

Your benefits

- Planning certainty for manufacturers and architects
- Support for operators to fulfil their duties as per the German Ordinance on Industrial Safety and Health (BetrSichV)
- Increased availability
- Increased operational safety

Our experts boast longstanding experience in the testing and inspection of escalators and moving walkways. Thanks to TÜV SÜD's proactive role in the preparation of technical directives and European standards, our employees are highly familiar with statutory requirements.

As the name TÜV SÜD is widely known and enjoys excellent reputation, you can rest assured that our reports and certificates will be widely accepted.

Interested in more detailed information about our services? Don't hesitate to contact us. We will also be pleased to prepare a free quotation without any obligation on your part.
