Project Management for Industrial plants

A Product Information Sheet by the Plant Engineering Business Unit

Setting up new industrial plants is always a capital-intensive undertaking. Quality in all project phases is a decisive factor in securing the long-term value of plant and equipment and influences inspection strategies during operation. TÜV SÜD, as an independent service provider, offers project assistance and expertise to manufacturers, operators and financial institutes. As a recognized and reliable partner, we provide professional assistance on all issues of quality, safety, environmental protection and reliable operation. Our experts are familiar with the relevant national and international regulations, technical codes and standards for the design, construction and operation of a plant.

Our Services

During design, erection and commissioning of plants:

- Preparation of specifications
- Support during tendering and contract award
- Management of inspections and tests
- Consulting on materials technology
- Assessment of component suppliers
- Quality assurance, site supervision
- Claim management
- Execution of performance and warranty tests, emissions, noise and vibration measurements

During plant operation

- Definition of tests and inspections (time and risk based)
- Damage assessment and analysis
- Optimisation of maintenance strategies
- Condition monitoring

Benefits

- ▶ Cost-effective support, minimisation of project risks
- ▶ Achieving adherence to time schedule
- ▶ Accredited testing and certification organisation
- ▶ Network of international subsidiaries
