

“Energy-Efficient Enterprise” Certification

Industrie Service

**Choose certainty.
Add value.**

“Energy-Efficient Enterprise” certification documents your sustainable operations.

Rising energy costs and the looming threat of climate change call for resource-efficient economic activities. TÜV SÜD offers “Energy-Efficient Enterprise” certification to companies wishing to document their future-oriented and sustainable energy use.

This comprehensive energy audit involves in-depth analysis of the use of resources. In contrast to the procedures applied so far, the assessment of energy efficiency also includes potential for emissions. During the course of the assessment, TÜV SÜD experts analyse technical and economic feasibility and the readiness of both management and

employees to implement measures, as potential for emissions always also depends on the local and company-specific framework conditions.

Point the way to the future in your organisation. Opt for “Energy-Efficient Enterprise” certification and demonstrate your values-oriented operations and your readiness for sustainable use of resources to the outside world. We will be happy to support you and look forward to hearing from you.
