BlueRegistry – Your TÜV SÜD Database for Transparency in VER and Certificate Trading.

BlueRegistry is an Internet platform by TÜV SÜD designed to make it easy to manage and document information on carbon credits from voluntary activities and renewable energy certificates.

BlueRegistry is an open system displaying the current ownership and origin of the credits / certificates, creating transparency and thus offering certainty to market players.

BlueRegistry aims to prevent double selling of listed credits / certificates.

BlueRegistry is ideal for

- ▶ Project owners and developers of emission reduction projects certified as per the VER+ standard.
- ▶ Traders of VER+ carbon credits.
- ▶ Companies aiming to achieve carbon neutrality.
- ▶ Producers, users and traders of TÜV SÜD-certified or confirmed electricity from renewable energy sources.

Sign up for BlueRegistry now. The system can be accessed at www.blue-registry.com

TÜV SÜD.

BlueRegistry – The Benefits:

- BlueRegistry supports you, the account holder, in managing your carbon credit and renewable energy certificate portfolio.
- BlueRegistry provides detailed information on the activity that has generated the credits and the corresponding verification process.
- BlueRegistry enables information on credits and certificates to be managed in a traceable manner. If trading takes place on the basis of contracts, the certificate database is updated based on corresponding proofs of transfer.
- BlueRegistry is an open system that also enables credit documentation to be withdrawn if credits are sold to a buyer holding an account with another register.
- BlueRegistry offers retirement services for credits / certificates (e.g. for carbon neutrality). Retired credits / certificates are published in a list.
- BlueRegistry does not interfere with ownership of credits / certificates in any way.
- BlueRegistry is based on a robust infrastructure to offer the reliability and flexibility you need.

BlueRegistry Units

BlueRegistry is divided into two main sections and includes documentation about credits and certificates verified according to various standards. The standards define the “currencies” managed in BlueRegistry:

Carbon Credits	
VER+	Credits from emission reduction projects verified as per the VER+ standard.

Green Energy Certificates	
TRU	Proof of origin of electricity produced from power plants certified according to the TÜV SÜD Generation EE standards for “Generation of electricity from renewable sources”.
GoO	Guarantee of Origin of electricity produced from renewable energy sources according to EC Directive 2001/77 and national regulations.
