

“Energy Efficiency” Certification for Lift Systems

Industrie Service

**Choose certainty.
Add value.**

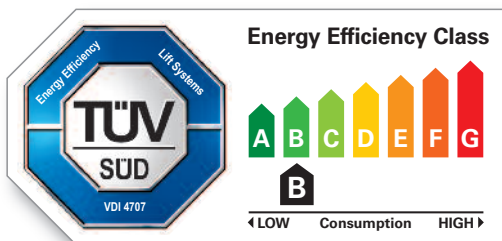

Energy Efficiency of Lifts as per VDI 4707. Identifying opportunities for energy saving. Cutting costs.

Guideline VDI 4707 Part 1 has introduced the first energy efficiency classes for lifts. The guideline provides the basis for measuring and calculating energy demand and consumption and for ensuring evaluation and labelling according to standardised criteria.

As TÜV SÜD’s experts, we assist you with the classification of your lift system. You obtain a certificate stating the energy efficiency class of your lift.

- ▶ Certification enables lift owners to assess the energy demand of their lifts correctly, revealing opportunities for energy saving and permitting cost reductions.
- ▶ For lift manufacturers, guideline VDI 4707 Part 1 proves an incentive to develop innovative, efficient solutions. By obtaining the certificate they can secure competitive edge and provide genuine guidance to buyers, developers, architects, planners/designers and lift owners.

Have your lift certified as per VDI 4707 Part 1 now. Opt for a partner offering impartiality, technical expertise and certainty from a single source.

TÜV SÜD. Choose certainty. Add value.

TÜV SÜD Industrie Service GmbH

TÜV®

Industrie Service

www.tuev-sued.com/is

Energy efficiency certification as per VDI 4707 for your lifts.

Sustainable management favourably affects your business results. We, as TÜV SÜD's experts, support you in achieving this goal. As your third-party partner, we provide impartial assessment and testing. The excellent international reputation of the TÜV SÜD brand also ensures that our reports and certificates meet with a high level of acceptance.

TÜV SÜD services

- Measurement of energy consumption under real-life conditions
- Calculation of the specific energy demand of lifts (energy efficiency classes from A to G)
- Issue of the lift energy certificate as per VDI 4707 Part 1
- Detection of possible weaknesses
- Development of packages of measures to boost energy efficiency
- Assessment of various energy-saving measures under functional and cost-efficiency aspects

Your benefits

- ▶ You obtain a report outlining the opportunities for energy saving offered by your lift.
- ▶ You obtain a certificate documenting the energy efficiency of your lift.
- ▶ You optimise the costs and energy input of lift operation.
- ▶ You demonstrate your support of resource-efficient management.
- ▶ You make a sustainable contribution to safeguarding the future of our environment.
- ▶ You generate competitive edge.
- ▶ You obtain a reliable partner with an excellent international reputation: TÜV SÜD.

We will be happy to advise you in more detail. Call us! We have international representation.
