Your partner for sustainability, reliability and safety during airport operation

In times of sustainability, energy consumption, quality of use, availability and general operating and administration costs are of central importance. Besides you are confronted with increasing safety requirements and an increased operator responsibility. Our experts know the legal rules and regulations and the technically feasible. We offer support with maintenance and servicing as well as modernising and retrofitting. Our objective assessments help to increase the availability, boost the cost-effectiveness and guarantee legal certainty.

A selection of TÜV SÜD services in operation:

Sustainability

- Environmental monitoring
- Assessing energy consumption, consulting to increase energy efficiency
- Assessing the airport for direct and indirect CO₂ emissions

Reliability

- Optimising the servicing strategy
- Optimising the design of (safety) technical systems such as airfield lighting, luggage conveyor systems, monitoring security areas
- Assessing service and comfort processes of the airport

Safety

- Continuous testing of systems and equipment
- Assessing the relevant safety processes
- Consulting for emergency management systems

Your benefits

- ▶ Ensure systems availability. Our experts recognise weak spots early. Faults and breakdowns can be avoided.
- ▶ Gain legal certainty. We know the technical directives, rules and regulations and standards like no other. This helps with uncertainty and reduces your risk of liability.
- ▶ Reduce your administration costs. Test certificates will be created electronically and automatically stored in netDocX, the web-based logbook. Thus they can be accessed easily at any time and are documented in a legally compliant way.
- ▶ Improve cost-effectiveness. Our engineers recognise optimising potential and develop customised solutions for increased efficiency.
- ▶ Benefit from our strong brand name. The first-class reputation of TÜV SÜD assures a high acceptance of our certificates and reports.

TÜV SÜD.

Choose certainty. Add value.
