

“Complex Energy Consulting” by TÜV SÜD reduces your energy costs.

The liberalisation of the electricity market has enabled many organisations to significantly reduce their power purchasing costs, and liberalisation of the gas market has been initiated.

However, the full potential for cost reduction has not yet been exhausted. Energy purchasing and use still offer major scope for savings. Within the framework of TÜV SÜD's Complex Energy Consulting services, an interdisciplinary team consisting of plant engineering, electrical and building services engineering and construction engineering experts provides an in-depth analysis of your organisation.

For this analysis, we review your documentation and carry out an on-site inspection of your company completed by measurements. Our specialists review your supply contracts and your building services systems, the state of repair of systems and installations and your operating processes. We then work with you to develop a customised practical concept aimed at generating energy savings and improving the efficiency of your use of electricity, gas and other forms of energy. TÜV SÜD's practical experience shows that your investment will pay off before long. We will be happy to support you and look forward to hearing from you.

TÜV SÜD. Choose certainty. Add value.

Industrie Service

Future-oriented organisations opt for “Complex Energy Consulting” by TÜV SÜD.

Our approach

Stage 1: decision making

- Status-quo analysis
- Energy plan, including possible variants
- Economic Appraisal
- Selection of the best variant

Stage 2: realisation

- Action plan
- Project preparation, coordination and monitoring
- Energy controlling/energy management

TÜV SÜD Services

- Inspection of your organisation and its relevant facilities and installations
- Initial document review
- Development of an energy plan in accordance with stage 1
- Support in the implementation of the plan in line with stage 2
- Consultancy support following implementation of actions

Your benefits

- ▶ You slash your costs for energy purchasing and consumption.
- ▶ You strengthen the competitiveness of your organisation.
- ▶ You curb your CO₂ emissions and obtain tradeable certificates.
- ▶ You gain measures supporting the continuous improvement process of your EMS.
- ▶ You ease your workload and that of your staff and gain more time for your core business.

Our experts have long-standing experience in energy consultancy. As your independent partner, we develop a practical concept customised to your needs for efficient energy use, thus increasing the cost-effectiveness of your organisation. Opt for a partner offering impartiality and technical expertise from a single source: TÜV SÜD. We will be happy to advise you in more detail. Call us! We have international representation.
