## ASME Code services

The ASME Boiler and Pressure Vessel Code is the leading internationally accepted standard for the design, manufacturing and testing of pressure equipment and components worldwide. Components built in compliance with the ASME Code are not only recognised in the USA and Canada but in another 90 or so countries. ASME certification thus enables manufacturers to market their products worldwide and opens the door to customers conducting international operations. Products are identified by applying the ASME stamp to the manufacturer's plate. The ASME stamp confirms that products comply with the ASME Code, and thus with the required safety standards.

### TÜV SÜD services

TÜV SÜD Industrie Service cooperates with authorised ASME inspectors (AIs) to offer efficient support in all aspects related to the ASME Code. Our affiliated company, the US-authorised inspection agency (AIA) Arise BIIC, is accredited by the American Society of Mechanical Engineers (ASME) and can supply all ASME-related services – a further advantage for you. We offer:

- Consulting services addressing the ASME Code, also in combination with the EU Pressure Equipment Directive 97/23/EC
- Assistance with applications for manufacturer certification via Arise BIIC
- Support in establishing a QA system as per the ASME Code

- Preparation for the ASME certification audit
- Certification of welders and welding procedures
- Production control
- Review/preparation of calculations as per the ASME Code
- Final approval of components with or without "stamp".
- Advice (NDT) by ASNT inspectors
- ASME workshops
- Staff training

### Your benefits

#### Legal compliance and technical expertise

TÜV SÜD's experts boast long-standing international experience in plant and installation, steam and pressure engineering. Thanks to their intensive participation in the preparation of technical directives and European standards, our engineers are highly familiar with the state of the art and statutory regulations.

#### Access to international markets

TÜV SÜD Industrie Service is an EU Notified Body; we also have a highly qualified partner with ASME accreditation in the shape of our affiliated company Arise BIIC.

Given this, we can offer you CE marking and ASME certification from a single source, ensuring you are fit for going global.
